Upcode Software Labs

2024

full stack developer intern

Designed and implemented a responsive e-commerce application using python-django .

Integrated RESTful APIs to fetch and display dynamic data, enhancing the functionality of the applications.

Utilized Git for version control, maintaining a clean and organised codebase and facilitating seamless collaborations with team member

Participate in daily stand-ups and spring planning meetings.

PERSONAL PROJECTS/AWARDS & ACHIEVMENTS

yummy_kids 🌐

10/2025 – 10/2025

***Yummy Kids** is an online platform that provides **healthy, hygienic, and ready-made food for babies and kids**. It helps parents who are busy or traveling to get nutritious meals for their children easily.*

Yummy Kids – Online Baby Food Platform *Description:* An online platform providing healthy, hygienic, ready-made food for babies and kids, allowing parents to browse meals, add to cart, and checkout securely.

Technologies Used:

- **Backend:** Python, Django (MVC framework for building web applications)
- **Frontend:** HTML5, CSS3, Bootstrap (responsive and mobile-friendly UI)
- **Database:** PostgreSQL (for storing users, meals, and orders)
- **Version Control:** Git & GitHub (for source code management and collaboration)
- **Other Tools:** VS Code (development), Django Admin (backend management)

Yummy Cutie – Baby Food Ordering Website Personal Django

Project Tech Stack: Django, Python, PostgreSQL, Bootstrap, HTML5, CSS3

- Developed a fully functional e-commerce web application for healthy and hygienic baby food using Django framework.
- Designed an intuitive, kid-friendly UI inspired by platforms like Slurrrp Farm and Kids City, using Bootstrap and custom styling.
- Built dynamic meal listing by categories (Fruit Purees, Veg Purees, Cereals, Snacks) and filtered by age groups.
- Implemented user authentication system (sign up, login, profile), cart functionality, and secure checkout flow.
- Integrated media management for displaying meal images and descriptive content.
- Managed PostgreSQL database including models for Meal, Category, AgeGroup, Cart, and User Profiles.
- Used Django admin for backend management of meals and orders.
- Followed best practices in Django views, URL routing, and template inheritance.

blooming-bliss

Blooming — Responsive online flower shop featuring bouquet collections by occasion (Birthday, Wedding, Onam, etc.) with seasonal offers. Built a visually appealing, mobile-friendly design with image carousel and fresh flower promotions.

Blooming is a responsive online flower shop built with HTML, CSS, JavaScript, and Bootstrap. It features an image carousel, occasion-based bouquet categories, and seasonal offers like Onam specials. Designed for an attractive and user-friendly experience, it delivers fresh and beautiful flowers at affordable prices.

Little-dine

created a responsive website for kids healthy food by using html css bootstrap
